

ELECTRONIC THROTTLE CONTROLLERS

IMPROVES YOUR ACCELERATION
AND REDUCES TURBO LAG

Coast to Coast's throttle controllers are the newest tool to help you drive smoothly and more effectively. They remove delays in the accelerator to help you manoeuvre your car easily, even when towing or on difficult terrain! Our throttle controllers alter the acceleration curve on electronic throttle controlled vehicles. They digitally alter the shape of the curve increasing throttle response and improving your overall driving experience.

FEATURES

- > A huge range of cars, 4wd's, vans and trucks supported
- > Suitable for Petrol and Diesel vehicles
- > Supports both manual and automatic transmissions
- > Improved throttle response for all vehicle types
- > Reduced pedal delay
- > Reduced lag on automatic gear changes
- > No more 'flat spots' - the transmission applies power more evenly
- > Ready to use in seconds thanks to OEM plug in connectors
- > User selectable to suit driving conditions
- > Thoroughly tested under road and race conditions
- > Simple installation and removal - leave no trace
- > Made in Germany for quality guarantee
- > All throttle controllers are specifically programmed for your vehicle
- > Two year warranty for peace of mind

ELECTRONIC THROTTLE CONTROLLERS

The controller is located between the accelerator pedal sensor and the control module. It works by capturing the accelerator pedal signal and transforms it with digital accuracy. This product lessens the pedal travel required to achieve full throttle response, allowing the driver to exploit the full potential of their engine with less effort. There are four driving modes, Off, Sport+, Sport and Eco/City and each mode can be optimized by a further six levels of curve control. This means that the settings can be adjusted to best suit your driving style. A huge range of cars, 4WD's, vans and trucks are supported and they are suitable for both petrol and diesel vehicles as well as manual and automatic transmissions. Installation is a breeze with our simplified plug and drive system.

Coast to Coast's range of throttle controllers is expanding rapidly, for up to date information on the model that is best suited to your vehicle please visit our website or consult your local stockists - www.coastrv.com.au

4 DRIVING MODES

OFF

PROG

OFF mode for driving on very slippery road surfaces brought about by ice, snow or heavy rain.

SPORT

PROG

Perfect for merging quickly with road traffic or when overtaking is required.

SPORT +

PROG

In Sport+ mode, throttle response is increased by up to 16% and is suitable for most situations.

ECO/CITY

PROG

ECO/CITY mode is suitable for stop and go driving. It guarantees improved response in the lower RPM range is programmed to achieve economical fuel consumption. Also reduces the throttle sensitivity in low range when slow driving off-road.

CURVE ADJUSTMENT

Choose from six levels to optimise the curve. You can increase the curve by three levels and reduce it by three levels in each driving mode.
