orbit[®] AIR COMET INFLATABLE AIR ANNEXE

SINGLE INFLATION ANNEXE

Spacious and light-filled the ORBIT[®] Air Comet Annexe is a perfect choice

SWITCH TO AIR BEAM TECHNOLOGY

Camping should be about relaxing and enjoying yourself, not spending precious time erecting old-fashioned pole-and-canvas annexes. Use the best annexe accessories that are reliable, easy to set up, take up little space, and will provide you with long-lasting enjoyment and protection.

SINGLE INFLATION POINT

The ORBIT[®] Air Annexe is fully sealed and rigged with one single inflation point - "plug and puff".

LIGHTWEIGHT CANVAS & UV PROTECTION

The ORBIT[®] Air Comet Annexe is made from materials designed to withstand challenging Australian climate. The heavy duty 300D Micro weave polycotton canvas with UPF50 sun protection.

orbit[®] AIR COMET[®]

INFLATABLE AIR ANNEXE

MEASUREMENT ADVICE

TOP 10 REASONS FOR PURCHASING AN ORBIT AIR CARAVAN ANNEXE

1. Super-fast pitching

Just couple of minutes to put up and take down! The speed of set-up makes Orbit Air Annexes super convenient and family-friendly.

2. Durability

The main structure of the Orbit Air Annexe uses inflatable air beams, which pulls the annexe taut, making it strong and sturdy. Air beams flex with the wind, eliminating breaking or bending poles by accident, or in extreme weather conditions.

3. Lightweight

With no bulky metal poles in the structure, the overall weight is easier to manage. The absence of poles reduces the weight in your rig, so you don't have to worry about your caravan being overweight.

4. Compact

Less bulky and more compact, Orbit Air Annexes take up a little space when packed away, so they only take a small storage area during transport and it's easier to pack them.

5. Spacious

Orbit Air Annexes provide much needed room for everything you need, because space is at a premium in a caravan!

6. Simple Assembly

The Orbit Air Annexe simply hooks up onto your trailer. Pump it up, peg it out and gain instant outdoor living or storage space.

7. Stable Structure

The Orbit Air Beams pull the tent walls taut, making the Annexe much more stable comparing to traditional annexes with poles. The Air Beams are also great at reducing noise made by wind or rain.

8. Affordable

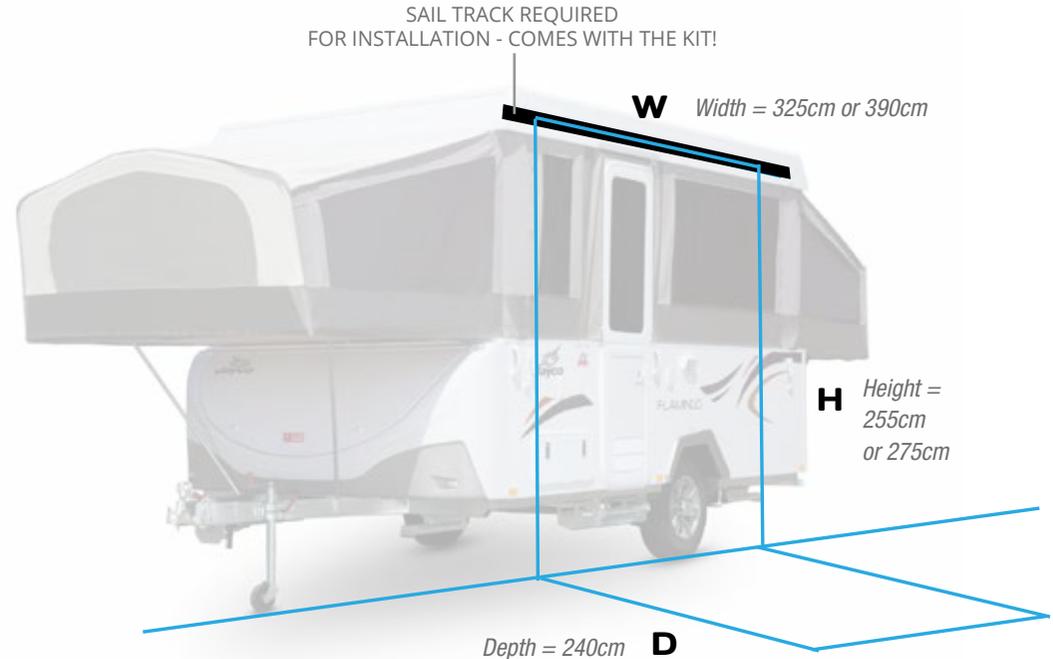

The Orbit Air Annexe range is reasonably priced. Don't get ripped off with an old-fashioned annexes..

9. Designed & Tested in Australia

Orbit Air Annexes have been designed using innovative, yet proven technologies to create a more enjoyable camping and caravanning experience in Australian outdoors.

10. Easy to Repair

With the Orbit Air Annexes it is easy to make a quick repair using the repair kit that comes with the equipment if required.

Measure the distance that your sail track would sit along the top of the van. Then work out the WIDTH, HEIGHT & DEPTH as shown to choose the annexe that suits.

THE ORBIT AIR COMET IS AVAILABLE IN 4 SIZES

- Orbit Air Comet 325 Low Dimensions: 325W x 240D x 255H
