

# The Lippert In-Wall Slide-Out Advantage !

## FEATURES AT A GLANCE

### Durable & Corrosion Resistant

Lightweight anodized aluminum resists rust better than systems with chains, cables and exterior mounting brackets.

### More Space

Slide-Out mechanism fits inside the wall cavity leaving significantly more interior space. Other bulky systems require a slide room fascia to cover motor and pulleys.

### Leak Free

The 50/50 power split ensures both slide room sides properly compress seals. Independent side control allows different stroke lengths to compensate for bulb seals setting or wearing down unequally.

### Lightweight

Lightest slide system on the market keeps overall RV weight down.

### No Adjustments

The In-Wall Slide-Out System never needs complicated adjustments.

### Smart Control Technology

Smart system continually monitors motors for safe operation, and stops the slide-out if an issue is detected.

# The Lippert In-Wall Slide-Out Advantage !

Lippert Components are the largest supplier of Slide Out Systems to the US RV Market. Started in 1957, their longevity in the RV industry stands as a testament to the quality workmanship that goes into each kit.

Exclusively available through Coast to Coast, Lippert have come up with ready-to-use In-Wall™ Slide Out Systems, allowing Australian manufacturers to provide more living space to RV consumers without compromising overall size.
