FURRION

- **Free up roof space for solar panels - off grid power**
- **Reduce weight on the roof for pop top caravans**
- **Easy to install in after market application**

Introducing the Furrion 2.6kW BTU Underbench Air Conditioning Unit - the ultimate solution for small to medium-sized RVs. With its sleek design and auto mode technology, this AC unit is designed to keep you comfortable in the Australian climate all year round.

The Furrion AC unit can be conveniently concealed under a bench, bed, or cabinet, freeing up valuable roof space for solar panels and reducing the weight load on Pop Top caravans. The reverse cycle heat pump provides both cooling and heating capabilities, making it a versatile option for year-round use.

With the fan-only mode and dehumidification feature, this air conditioner can be used to circulate air and reduce humidity in your caravan or RV. The timer on/off function allows you to set the unit to turn on or off at specific times, so you can come back to a perfectly cooled or heated space. The Furrion AC unit also features an auto mode that adjusts the temperature based on the room's ambient temperature, ensuring maximum comfort with minimal effort. You can control the unit using the included remote control or the wired wall pad, making it easy to adjust the settings from anywhere in your RV.

The Furrion 2.6kw BTU Underbench Air Conditioning Unit is designed with high efficiency and low power consumption in mind, so you can stay cool or warm without worrying about high energy usage. Get ready to experience the ultimate comfort on your next camping trip with the Furrion Underbunk AC unit.
