WiFi Router

+GPS CAT6

The Sphere CAT6 4G WiFi Router with GPS is the ultimate travel router and is designed for smooth internet surfing on the go. With its in-built flash drive/hard drive sharing feature, streaming movies, videos, and files from the router is easy, and you don't have to worry about consuming data.

The router uses CAT6 technology, which increases download and upload speeds, making your browsing experience faster and more efficient.

The built-in Wi-Fi Extender feature allows you to connect to other Wi-Fi networks within range, reducing your data consumption even further.

Upgrade your internet experience with this feature-packed router today.
